WELCOME LETTER

The Algerian Society of Rheumatology (SAR), the Algerian Anti-Rheumatic League (LAAR), and the Association of Private Algerian Rheumatologists (ARAP) are pleased to announce the upcoming Arab League of Associations for Rheumatology Congress, **ArLAR25 Algeria**, which will be held in person from **April 23 to 26, 2025**, in **Algeria**.

This congress promises to be a landmark event, bringing together leading Arab and international experts in the field for insightful exchanges and major scientific advancements.

The four-day program is rich with current topics and will feature plenary sessions, parallel sessions, and continuing medical education lectures. Practical workshops will also be organized to encourage interaction and debate among participants. In addition to various educational sessions presented by distinguished Arab and international speakers, the congress will offer a platform for oral and poster presentations showcasing diverse research conducted by numerous rheumatology teams.

This congress represents a major opportunity to bring together the rheumatology community to achieve new milestones through multidisciplinary sessions and educational initiatives, all designed to foster collaboration and knowledge sharing.

We would be honored by your presence and participation, which would be a valuable contribution to this prestigious event.

Face à la Fibrose pulmonaire

PRENEZ LES DEVANTS

et modifiez la progression de la PID
en ralentissant le déclin de la fonction pulmonaire
à l'aide de l'OFEV® (nintedanib)¹⁻⁴

OFEV® ralentit irréversiblement la progression de la PID avec une réduction de 57% du déclin de la CVF sur un large éventail de types de patients ^{1,3}

OFEV® réduit de 33% le risque d'exacerbation aiguë de la PID ou de décès ¹

OFEV® a réduit l'aggravation de la toux et de la dyspnée ³

Les effets indésirables peuvent être pris en charge efficacement chez la plupart des patients ¹

OFEV® offre une efficacité et une sécurité constante dans la FPI, la PID-ScS et d'autres PID Chroniques Fibrosantes à Phénotype Progressif ¹
